

Job posting: Geophysicist – Abitibi Geophysics

About us:

Abitibi Geophysics is a leader in advanced geophysical solutions for exploration and geotechnical applications. We focus on cutting-edge technologies and building lasting client relationships. We are looking for a Geotechnical Specialist to provide technical expertise while driving business development in near-surface geophysics and geotechnical applications.

The geophysicists at Abitibi Geophysics ensures technical supervision of field teams, the quality of collected data, the production of the final report, and overall client satisfaction with the delivered product.

We are looking for a: **Geophysicist**

It is imperative to have valid Canadian work permit.

Description:

- Verify and control the quality of the geophysical data collected and carry-out any required corrections to the field procedures while a project is ongoing, if needed.
- Take the initiative of communicating with the client, especially regarding the geophysical objectives of the survey or consultation, and the progression of a project.
- Ensure the control of the technical aspects, the efficiency of the procedure, the quality of the results and the compliance with customer requirements.
- Collect and process all geophysical data, conduct any modelling and interpretation in accordance with the deliverables outlined for the project.
- Interpret results and write a report in accordance with client expectations and internal standards.
- Conduct an internal review of interpretation of the geophysical survey results with the technical director and the geophysical team.
- Ensure the production of the final report and the customer's satisfaction with the product delivered.
- Check each component of the final report before authorizing reproduction and signatures.
- Present the results to the client at the end of each project to ensure a complete understanding of the data, products and recommendations.

Requirements:

- B.Sc. in Geophysics/Geology or Physics.
- Experience in mineral exploration.
- Prior experience in IP, EM, MAG, and/or Gravity are an asset.
- Working knowledge of software like Geosoft Montaj and Maxwell.
- Qualifications to become a member of OIQ, OGQ, PEGNL, APGO, or similar professional organization.

What we offer:

- We aim to train employees on a wide range of methods and survey types that we are offering.
